

November 30, 1956.

Mr. J. T. Leigh  
Coal Creek Water Commissioner  
Cedar City, Utah.

Dear Sir:

RE: COAL CREEK  
DISTRIBUTION

Answering your letter of November 29, 1956, this is to advise you that this office, at present, is not ready to make further rulings on the distribution of the winter water of Coal Creek.

It is recommended that you follow the procedures as you have done in the past as amended by my recommendations of last winter.

Very truly yours,

*Joseph M. Tracy*

Re: Coal Creek Water Distribution

Dear Sir:

The question has been asked me several times lately, "How am I going to handle the winter water?"

Previously the major part of the flow has been turned to the Coal Creek Company Users and a small stream to each of the Primary Company Users for stock-watering purposes.

I understand that you instructed the Commissioner as to the manner of distribution for last years winter water but that further consideration would be given the matter for this year.

I would appreciate a little help on this matter.

Yours truly,

J. T. Leigh  
Coal Creek Water Commissioner
